

## High Flow in a Compact Body

Jandy MaxHP pumps offer high flow in a compact body. They are ideal for situations that demand maximum flow such as, waterfalls, laminar jets and other water features. Our proprietary impeller and body designs deliver ultra-quick primes and optimum performance. The MaxHP is designed with a compact body so it will easily fit in small equipment areas. It is the perfect choice for a pool with suction cleaner.

### HIGH FLOW RATE

The high flow MaxHP pumps are perfect for medium head water features such as laminar jets, waterfalls, sheer descents and vanishing edge pools. The MaxHP is also a perfect choice for a pool with suction cleaner.

### QUIET TECHNOLOGY

MaxHP pumps incorporate "Quiet Technology" into every pump. This proprietary design controls the flow dynamics within the pump, resulting in less noise and quiet operation.

### GREAT FEATURES

The MaxHP offers many great features including 2 by 2½" quick-connect unions, a flared base for easy anchoring, an ergonomic cam-lock lid with easy to read aligning indicators, and a AO Smith motor.

### SAME COMPONENTS AS PlusHP

For ease of service and maintenance, most components of the MaxHP pumps are interchangeable with the PlusHP line of pumps. The compact body is great for small equipment areas.

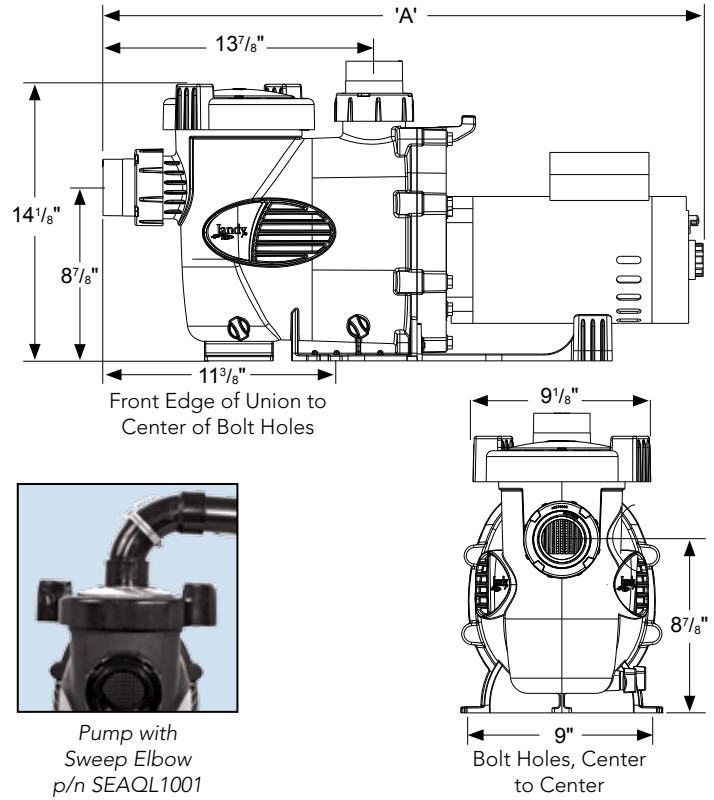

# Jandy MaxHP Pumps - High Flow

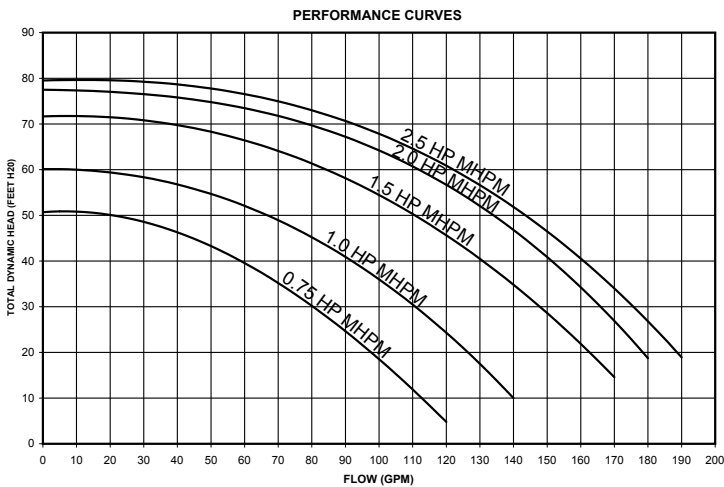

Jandy's line of MaxHP pumps offer a maximum flow rate in a compact body that is perfect for medium head water features. The MaxHP offers many of the same great features as our flagship pump, the Stealth. For ease of service and maintenance, most of the parts on the MaxHP are interchangeable with the PlusHP line of pumps.
